

PROFESSIONAL Garden Consultation Services

• For Homeowner Gardeners •

GASPER

OUTDOOR LIVING PERFECTED

February 2026

Professional Garden Consultation Services available at Gasper to improve your garden!

What's included: Up to 90-minute consultation with one of our landscape designers. Cost: \$500. At the end of our time together, you will leave with an evaluation of your existing garden and landscape—complete with a punch list of suggestions for improving your garden. A hand-drawn design sketch, (if applicable), will be provided to help you implement new planting areas we discuss. Plus, a \$250 Gasper Gift Card which can be used towards the purchase of plants or other products discussed during the consultation.

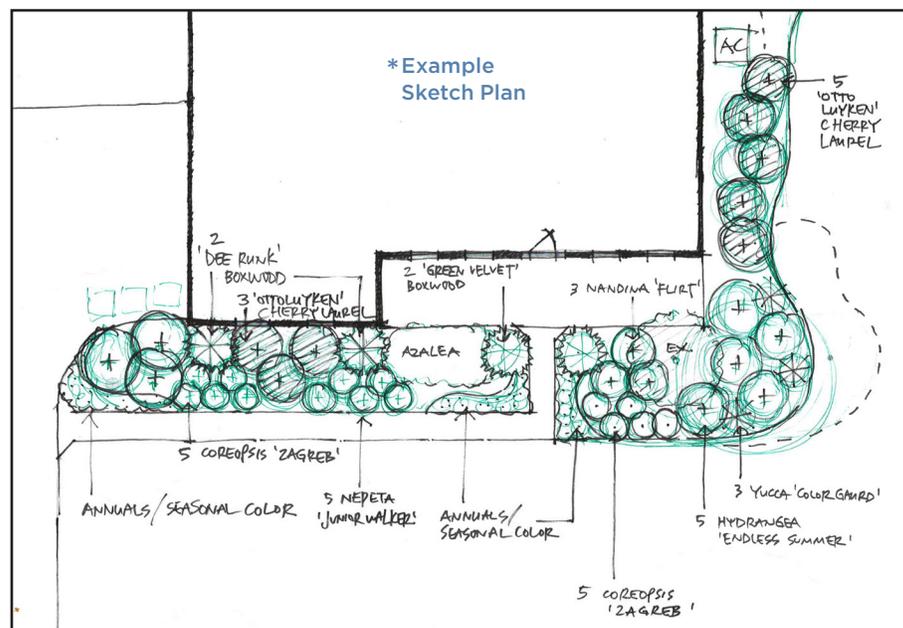

We can follow up with our meeting with an estimate for installation of the plantings if you need a little more help.

Scheduling your Design Consultation

To secure your reservation, visit our website at shopgasper.net or call us at 215-364-2400; we will schedule your in-office consultation (up to 90 minutes) with our Gasper landscape designer, Jeannie Sachs. Garden consultations are scheduled Monday-Friday, usually during normal business hours. (Some evening appointments may be available.)

For the cost of \$500
You can have an up to
90-minute consultation with
a Gasper Landscape Designer.
You will leave with a
professionally designed
hand-sketched plan, and a
\$250 Gasper Gift Card!

Getting Ready for your Consultation

Please have the following information ready for your consultation. The better prepared you come, the more value you will receive from our meeting.

1. Photographs:

Photos of your garden are REQUIRED!

Please shoot your project from several different angles. Please take close-up photos of any existing plant material in your garden and design area so that they are easy to identify and evaluate. You will then email these photos to your designer prior to your meeting. Color prints are also acceptable. Please do not rely on photos shown from your smartphone—they are too small for the designer to see the details needed to give you their best recommendations. Be sure to include views you want to enhance or block.

2. Measurements:

Measurements are essential for an accurate design layout. Use the scaled graph paper on pages 4-5 to help measure your project area (one box = 1 foot by 1 foot). If you have a copy of your property plot plan or a surveyed as-built plan, that would also be helpful to bring to the consultation, but this does not replace taking your own measurements of the areas you want to address.

Measurements most helpful to the designers are:

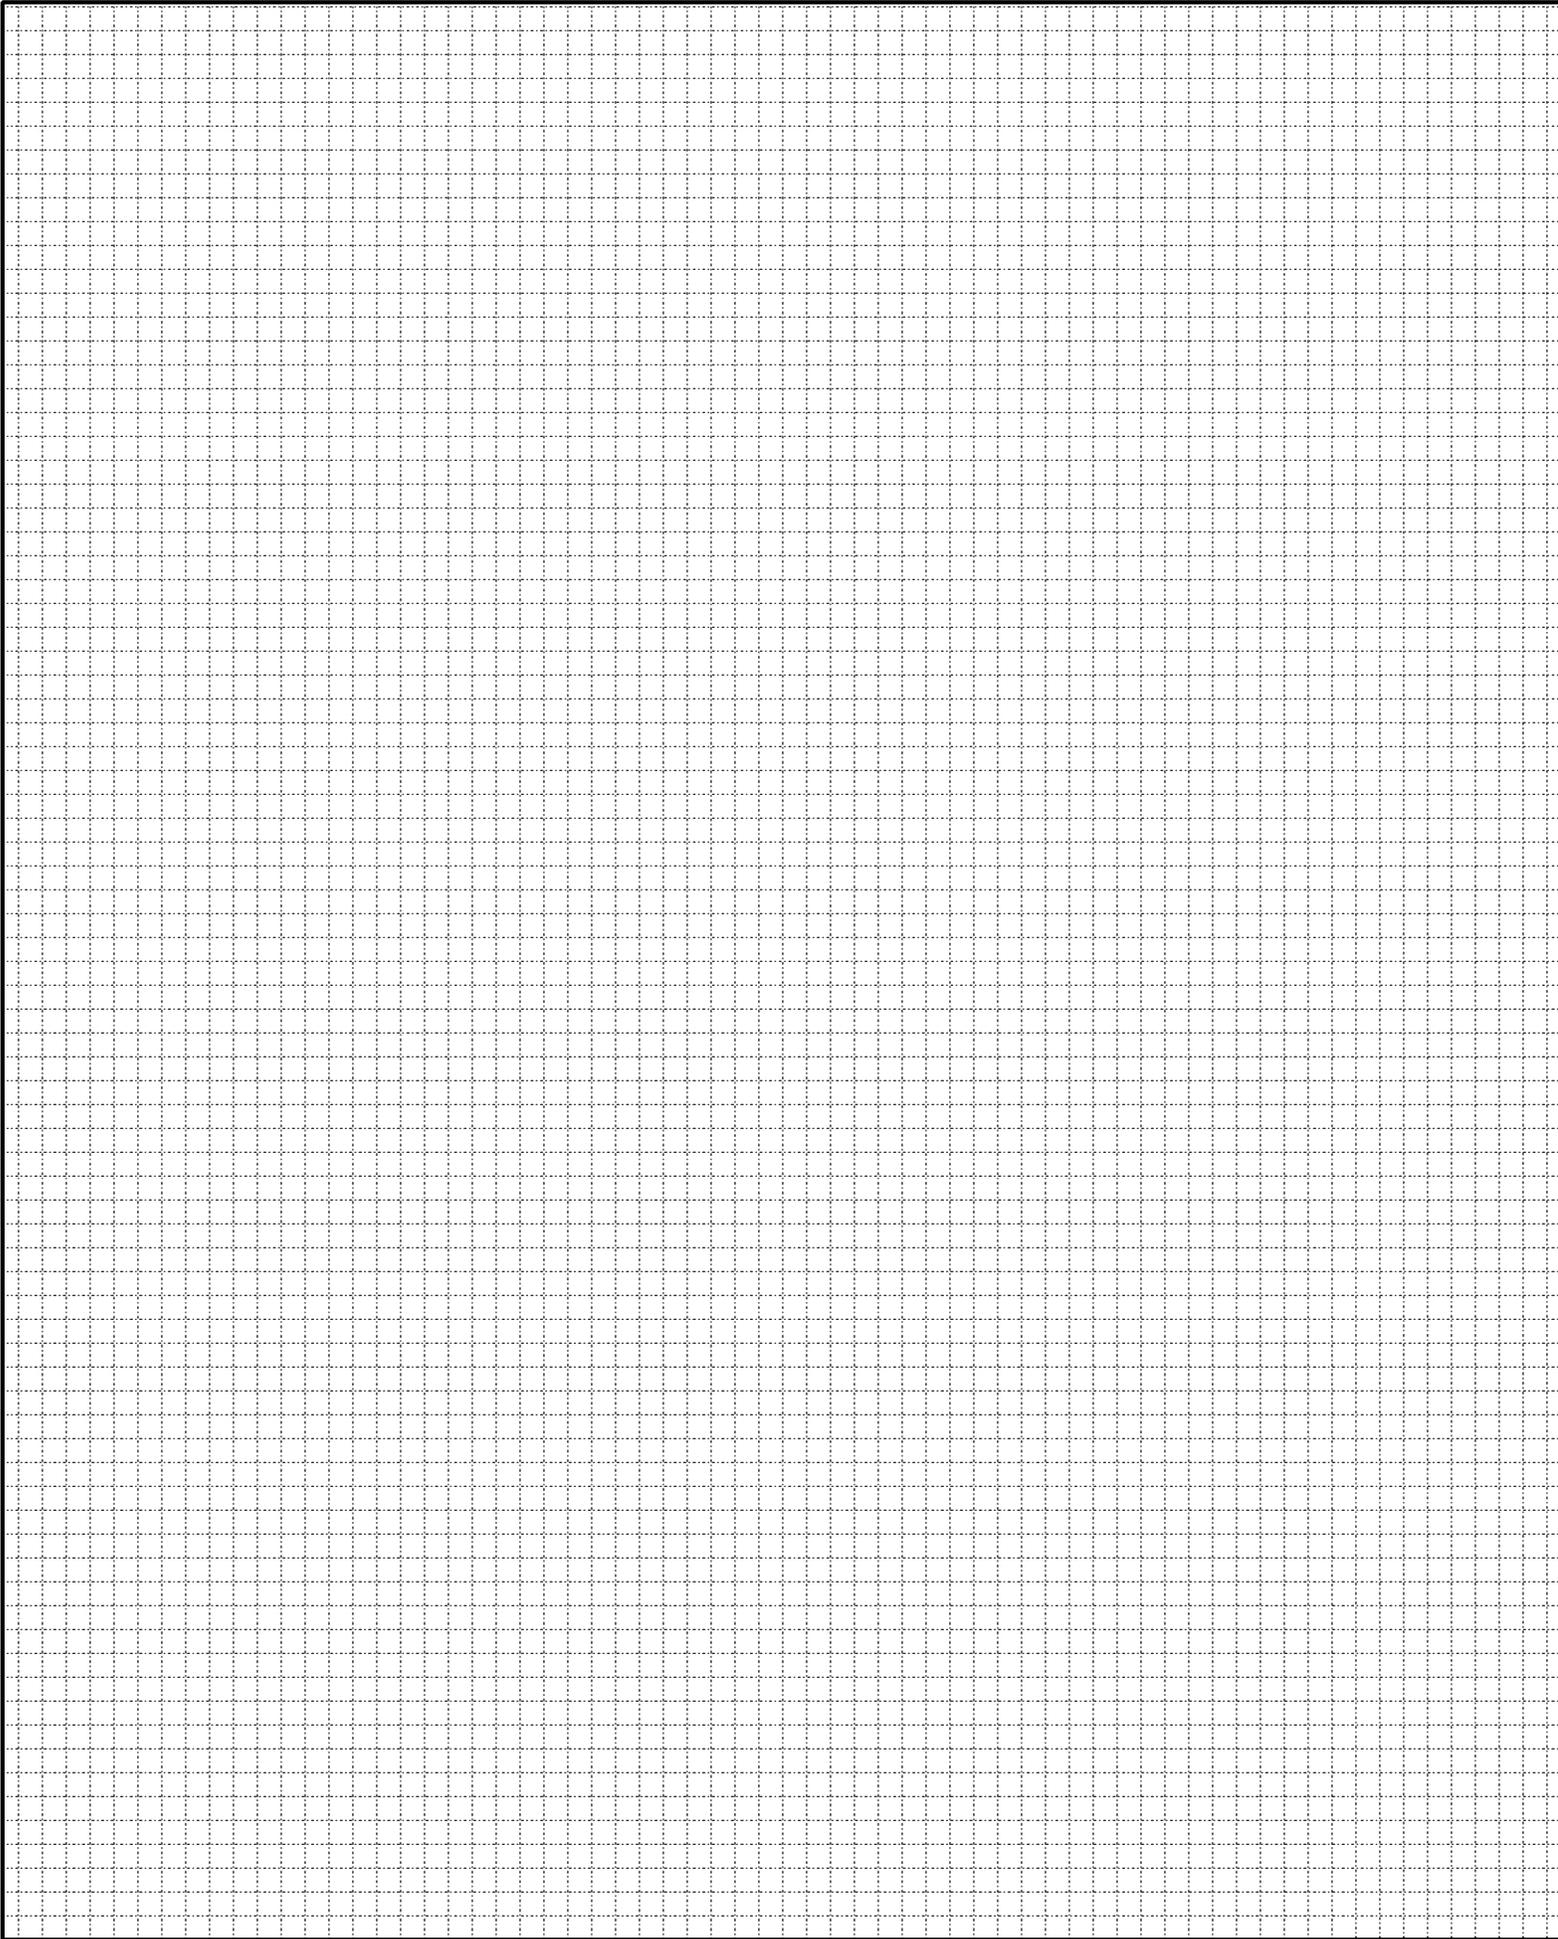

- ▶ House footprint/foundation, including locations of windows, doors, steps and walkways
- ▶ Property lines, setbacks, easements and close approximations to any swales
- ▶ Distances of and between elements as they relate to your project area
- ▶ Location and distances to existing large trees, planting beds, fences, utilities, or anything else you feel impacts your project area
- ▶ More measurements are always better than too little or missing information

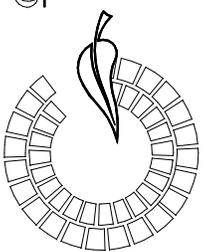

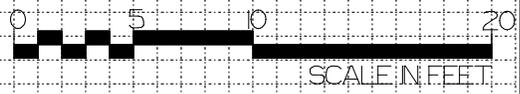

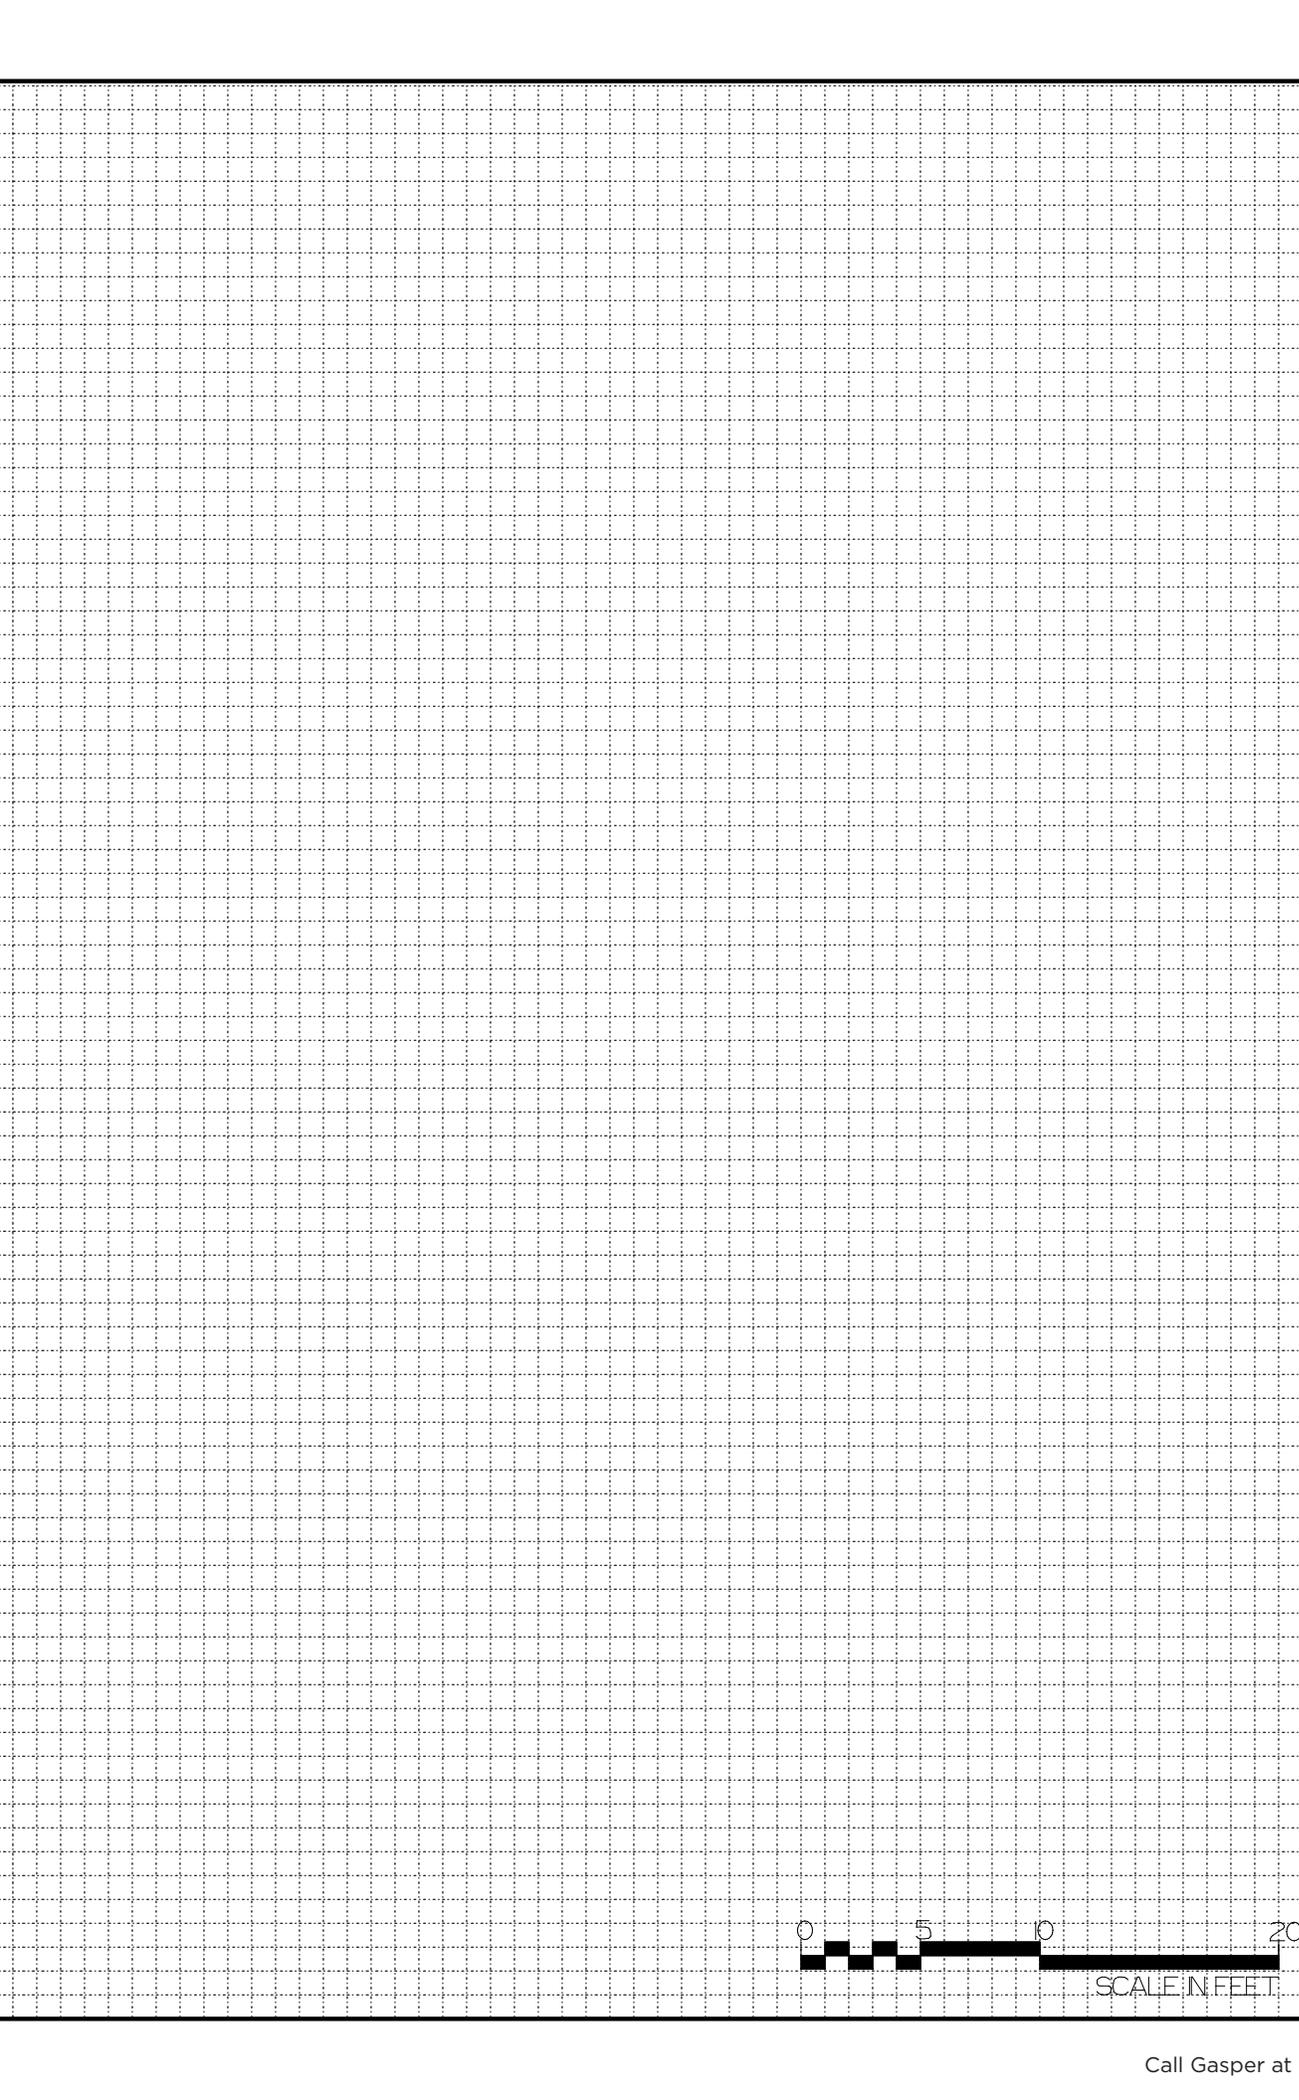

3. Before your consult please think about the following questions:

- ▶ How do you envision using the space?
- ▶ Any preferences you have such as favorite styles, plants or colors?
- ▶ Do you have deer that visit your yard?
- ▶ How much time do you have for maintenance?
- ▶ What areas do you struggle with and why?

Service Limitations

This service does not include drafted plans/drawings, complex hardscape projects, 3-D models, elevations, or projects requiring more than 90 minutes of consultation. This service is suited for small-scale garden spaces for gardeners. If you have a larger project, or one that will require more than 90 minutes of consultation, we would recommend you either make multiple appointments (which will require an additional purchase of \$500 Consult/gift card) or contact our landscape division to see if the scope of your project may be better suited to our landscape and hardscape division.

Meet With Our Professional Landscape Designer

Jeannie Sachs

Jeannie Sachs, is a highly skilled Landscape Consultant and Pennsylvania Certified Horticulturist, with a passion for creating beautiful gardens. She is a proud graduate of Columbia University, with a strong academic foundation that is further enriched by completing the esteemed Rutgers University Master Gardener Training Program.

With years of experience in the horticultural industry, Jeannie specializes in professional garden design consultations, providing clients with tailored advice to transform their outdoor spaces.

Whether you're looking to revitalize an existing garden or start a new project from scratch, Jeannie is dedicated to delivering personalized solutions that enhance both the beauty and functionality of your landscape.

-PULL MEASURING TAPES TAUNT + FLAT
 -MEASURING IS EASIEST WITH 2 PEOPLE

SOMETIMES IT IS EASIEST TO CLIP A TAPE MEASURE ON THE CORNER OF THE HOUSE AND TAKE A "RUNNING" MEASUREMENT AT EACH WINDOW OR DOOR SEE BELOW

DRAW IN YOUR NORTH ARROW USING GOOGLE MAPS. WHERE NORTH IS ALWAYS UP

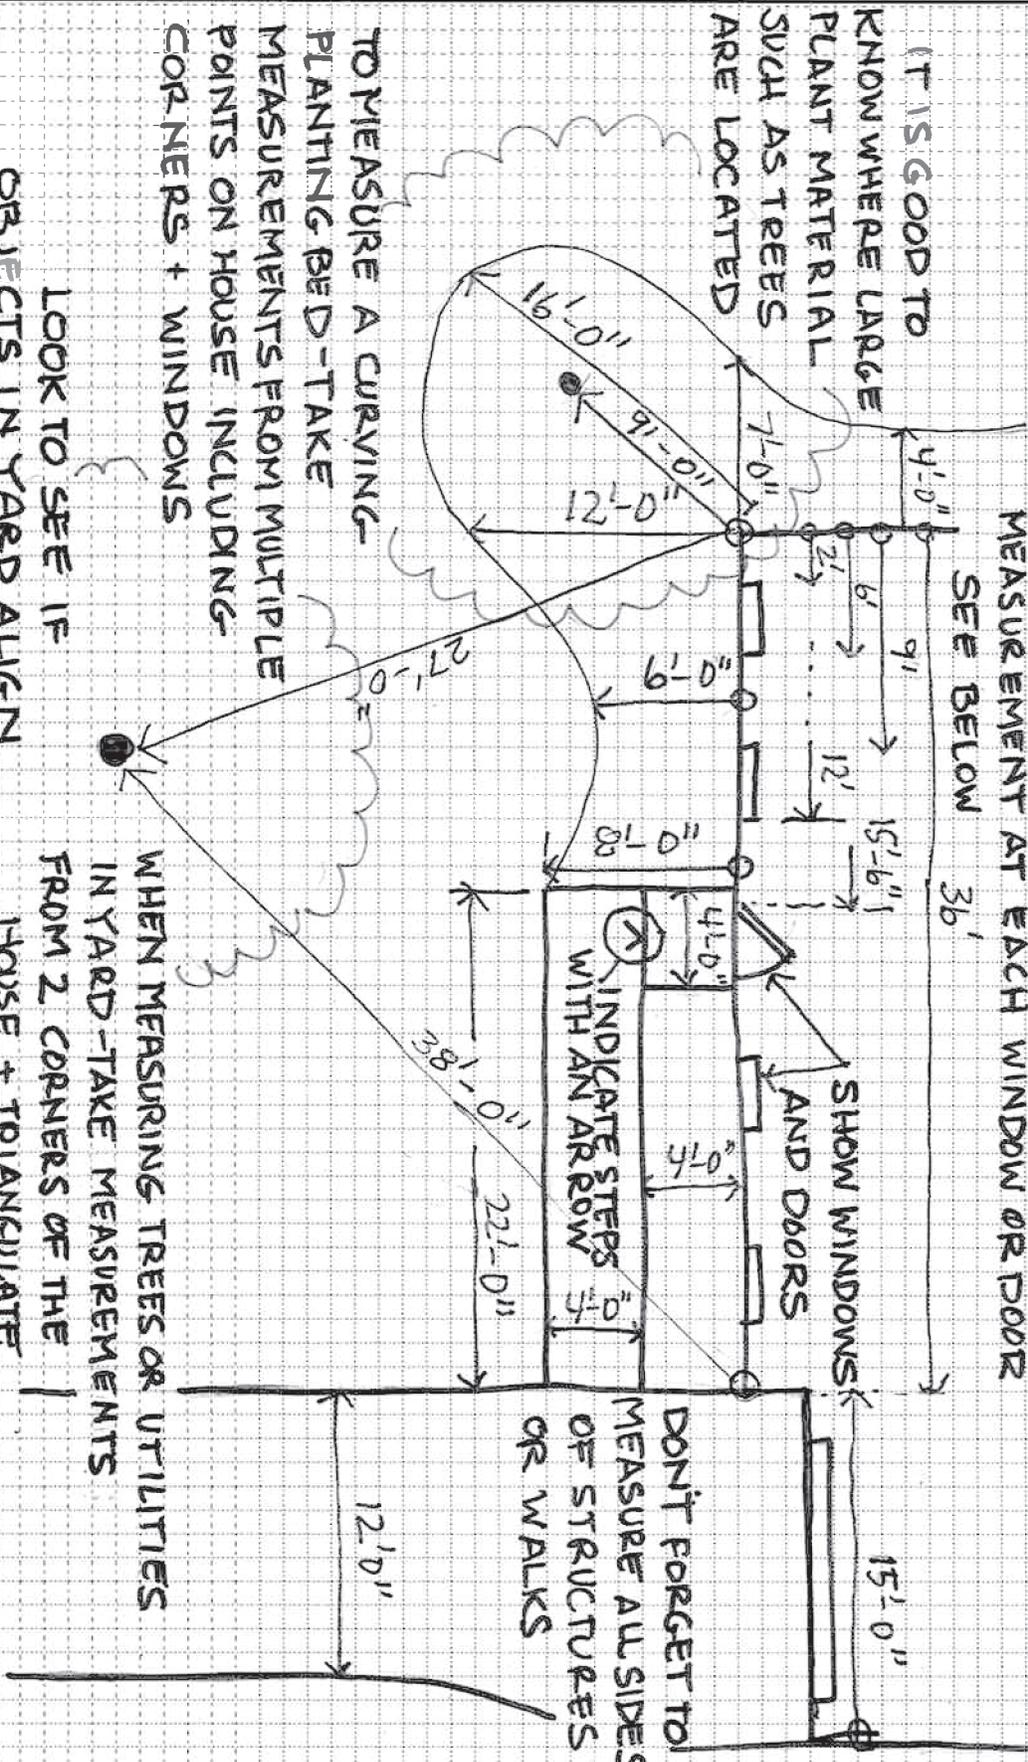

IT IS GOOD TO KNOW WHERE LARGE PLANT MATERIAL SUCH AS TREES ARE LOCATED

TO MEASURE A CURVING-PLANTING BED - TAKE MEASUREMENTS FROM MULTIPLE POINTS ON HOUSE INCLUDING CORNERS + WINDOWS

LOOK TO SEE IF OBJECTS IN YARD ALIGN WITH CORNERS OR WINDOWS ON THE HOUSE

DON'T FORGET TO MEASURE ALL SIDES OF STRUCTURES OR WALKS

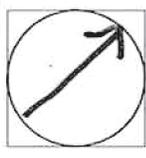

WHEN MEASURING TREES OR UTILITIES IN YARD - TAKE MEASUREMENTS FROM 2 CORNERS OF THE HOUSE + TRIANGULATE THE LOCATION
